

## 4500 SERIES TILT-SLIDE DOOR

The Amerimax 4500 Series tilt-slide system is a premium door solution for spaces that do not allow for traditional inswing doors. The unique sash design tilts and slides parallel to the fixed unit with the touch of a finger. Optimal profile design and compression-seal technology contribute to outstanding performance. Available in white or clay colors, the system can also be laminated with solid color or wood-grain foils. Matching windows are also available.

### 1 Unique design

Operates in top venting and sliding positions

### 2 Multiple locking points

Create a tight seal against sound, air and water infiltration

### 3 Ergonomically shaped aluminum turn handle

Controls every function

### 4 High-quality European hardware

Operates easily and quietly

### 5 Built-in security in tilt position

When in the tilt position, the sash automatically engages the locking mechanism providing security against being pulled open

### 6 1 5/16 in (33 mm) glazing channel

Accommodates triple glazing, increasing energy efficiency and acoustical properties

### 7 2 3/8 in (60 mm) frame depth

Provides flexibility for new construction and replacement projects

### 8 Structural T-mullion profile

Allows door to be configured as multiple panels

### Performance Summary

AAMA: up to Class CW-PG55-SD

CSA A440: up to Class A3 B5 C4

U-factor down to 0.22\*

ASTM E90 Acoustical (STC): up to 40 dB
